OSs: Windows, Linux, Mac
Foreign Languages: English
Others:

- Proficient in using Git and GitHub.
- Proficient in designing, developing, and securing RESTful APIs.
- Have experience working with WebSocket.
- Read and write documents in English.
- Excellent teamwork communication skills.

Work Experience

Fullstack Developer - Vietnovel Corporation   *2.2023 – 11.2023*

- Developed web applications using NextJS.
- Collaborated with the backend team for API integration.
- Optimized web applications performance.
- Optimized SEO for enhanced online presence.
- Developed web applications using Django.
- Builded the data of the web application.

- Joined the back-end team to create APIs.

Project: Office Tech Blog (4 members)   *09.2023 – 11.2023*

- **Link**: *https://tinhoc.org/*
- **Description**: The Office Tech Blog project will provide a platform for discussions and knowledge sharing about computer science, allowing users to create threads, reply to threads, comment, and read professional articles.
    - The homepage displays a list of all categories and featured articles.
    - Users can browse into categories to view subcategories, followed by specific fields or topics.
    - Users have the ability to create articles and threads related to specific topics.
    - Users can comment on each article and thread.
    - Implementing Algolia for search functionality.
- **Team size:** 1 Leader, 1 Front-end Developer, 1 Back-end Developer, 1 Designer**.**
- **My position:** Front-end Developer
- **My responsibility:**
    - Communicates continually with the project teams and Explains progress on the development effort.
    - Translate designs and style guides provided by the UI/UX team into functional user interface, ensuring cross-browser compatibility and performance.
    - Optimized SEO for enhanced online presence.
    - Contributes to continual improvement by suggesting improvements to the user interface, or use of new technologies.
    - Write documentation.
- **Technologies used:** NextJS, Django, Redux, Material-UI, React Hook Form, webpack, Algolia JavaScript API Client, WebSocket.

Project: Nettruyen clone (2 members)   *03.2023 – 6.2023*

- **Description:** This project aims to clone Nettruyen and explore NextJS and Django during the internship at Vietnovel Corporation.
- **Team size:** 1 Front-end Developer, 1 Back-end Developer.
- **My position:** Front-end Developer
- **My responsibility:**
    - Full responsibility for the project's Front-end. Utilized Next.js as the web server and crafted UI/UX with Tailwind CSS.
    - Collaborated with the back-end team in various stages of API development.
    - Creating a Python tool to download stories from the original website to our database.
- **Technologies used:** NextJS, Django, Redux, Tailwind CSS, React Hook Form, webpack, Algolia JavaScript API Client, antd, Material-UI.
